Theoretical

Computational methods for electronic structure

Monte Carlo and molecular orbital study of solvent effect on the electronic structure and hyperfine coupling constants of the $(CH_3)_2NO$ radical: the effect of electron transfer between the solute and solvent molecules, T. Yagi, H. Takase, K. Morihashi and O. Kikuchi 232 (1998) 1

Theoretical study of X-ray circular dichroism of amino acids, O. Plashkevych, V. Carravetta, O. Vahtras and H. Ågren 232 (1998) 49

On the electronic structure of Cu(III) and Ni(III) in $La_2Li_{1/2}Cu_{1/2}O_4$, $Nd_2Li_{1/2}Ni_{1/2}O_4$, and Cs_2KCuF_6, Z. Hu, G. Kaindl, S.A. Warda, D. Reinen, F.M.F. de Groot and B.G. Müller 232 (1998) 63

Bridged-assisted electron transfer. Random matrix theory approach, E. Gudowska-Nowak, G. Papp and J. Brickmann 232 (1998) 247

Ab initio study of excited-state intramolecular proton dislocation in salicylic acid, A.L. Sobolewski and W. Domcke 232 (1998) 257

-CI and valence bond approach

Theoretical study of the Cl 1s and 2p near edge photoabsorption spectra of HCl by accurate ab-initio configuration interaction and density functional approaches, G. Fronzoni, M. Stener, P. Decleva and G. De Alti 232 (1998) 9

Bonding in molecular dications from the classical valence bond viewpoint. A case study of CO^{2+}, R. Polák 232 (1998) 25

A Valence-Bond/Hartree–Fock method to determine the Hubbard transfer integrals in organic conductors, F. Castet, L. Ducasse and A. Fritsch 232 (1998) 37

Ab-initio study of a radiative association mechanism application to the $CH_3^+ + H_2$ reaction, D. Talbi and M.C. Bacchus-Montabonel 232 (1998) 267

Hartree–Fock limit properties of the water dimer in absence of BSSE, A. Famulari, M. Raimondi, M. Sironi and E. Gianinetti 232 (1998) 275

Ab initio MO–VB study of water dimer, A. Famulari, M. Raimondi, M. Sironi and E. Gianinetti 232 (1998) 289

-perturbative and many body approaches

Theoretical study of the Cl 1s and 2p near edge photoabsorption spectra of HCl by accurate ab-initio configuration interaction and density functional approaches, G. Fronzoni, M. Stener, P. Decleva and G. De Alti 232 (1998) 9

-density functional theory
Theoretical study of the Cl 1s and 2p near edge photoabsorption spectra of HCl by accurate ab-initio configuration interaction and density functional approaches, G. Fronzoni, M. Stener, P. Decleva and G. De Alti 232 (1998) 9
A density functional study of weakly bound hydrogen bonded complexes, A.K. Chandra and M.T. Nguyen 232 (1998) 299

Semiempirical methods
A Valence-Bond/Hartree–Fock method to determine the Hubbard transfer integrals in organic conductors, F. Castet, L. Ducasse and A. Fritsch 232 (1998) 37
The vibrational spectroscopy of $C_{60}H_{36}$: An experimental and theoretical study, R. Bini, J. Ebenhoch, M. Fanti, P.W. Fowler, S. Leach, G. Orlandi, Ch. Rüchardt, J.P.B. Sandall and F. Zerbetto 232 (1998) 75
Effect of the angular dependence of the barrier height on the features of the $F + H_2$ reaction, V.M. Azriel, L.Yu. Rusin, M.B. Sevryuk and J.P. Toennies 232 (1998) 307
Towards quantitative diatomics-in-molecules model for the water molecule, B.L. Grigorenko, A.V. Nemukhin and V.A. Apkarian 232 (1998) 321

Algebraic approaches
Bridged-assisted electron transfer. Random matrix theory approach, E. Gudowska-Nowak, G. Papp and J. Brickmann 232 (1998) 247
Water anomalies and the double-well Takahashi model, C.H. Cho, S. Singh and G.W. Robinson 232 (1998) 329

Wavefunctions for highly excited and unbound states
Theoretical study of X-ray circular dichroism of amino acids, O. Plashkevych, V. Carravetta, O. Vahtras and H. Ågren 232 (1998) 49
A theoretical study of the electronic structure and spectroscopic properties of the low-lying electronic states of the molecule AlSi, F.R. Ornellas and S. Iwata 232 (1998) 95

Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)
Ultrafast laser control of vibrational dynamics for a two-dimensional model of $HONO_2$ in the ground electronic state: separation of conformers, control of the bond length, selective preparation of the discrete and the continuum states, M. Oppel and G.K. Paramonov 232 (1998) 111
Ab initio variational calculation of dynamic polarizabilities and hyperpolarizabilities. I. Polarizability and quadratic hyperpolarizability of water, carbon monoxide and hydrogen fluoride, A. Lembarki, C. Barbier, Ph. Lemaire and E.N. Svendsen 232 (1998) 343

Radiative (incl. relativistic) effects on molecules and molecular processes
Fluorescence lifetime of rovibrational states of h_4-acetaldehyde and spectra of d_4-acetaldehyde, S.-H. Jen, T.-J. Hsu and I.-C. Chen 232 (1998) 131
Ab-initio study of a radiative association mechanism application to the $CH_3^+ + H_2$ reaction, D. Talbi and M.C. Bacchus-Montabonel 232 (1998) 267

Reactive molecular dynamics including dissipative processes
Fluorescence lifetime of rovibrational states of h_4-acetaldehyde and spectra of d_4-acetaldehyde, S.-H. Jen, T.-J. Hsu and I.-C. Chen 232 (1998) 131

Dependence of volume-produced H^- ions on the wall recombination probability of H atoms in a low pressure H_2 positive column, J. Loureiro and J. Amorim 232 (1998) 141
Effect of the angular dependence of the barrier height on the features of the $F + H_2$ reaction, V.M. Azriel, L.Yu. Rusin, M.B. Sevryuk and J.P. Toennies 232 (1998) 307
Laser photodissociation of ketene at 230 nm, M. Castillejo, S. Couris, E. Lane, M. Martin and J. Ruiz 232 (1998) 353

Intramolecular dynamics
Solvation of chromone using combined Discrete/SCRF models, C. Alemán and S.E. Galembeck 232 (1998) 151
Pathway approach to ultrafast photochemistry: potential surfaces, conical intersections and isomerizations of small polyenes, W. Fuß, S. Lochbrunner, A.M. Müller, T. Schikarski, W.E. Schmid and S.A. Trushin 232 (1998) 161

Molecular dynamics of many particle systems and condensed phases
Effect of pressure and temperature on the H-atom tunneling in solid phase chemical reactions. The acridine/fluorene system, L.I. Trakhtenberg and V.L. Klochikhin 232 (1998) 175
Molecular dynamics studies of NaCl solutions in methanol–water mixtures. An effect of NaCl on hydrogen bonded network, E. Hawlicka and D. Swiatla-Wojcik 232 (1998) 361

Statistical computational methods (incl. Monte Carlo)
Bridged-assisted electron transfer. Random matrix theory approach, E. Gudowska-Nowak, G. Papp and J. Brickmann 232 (1998) 247

Fluctuations and random processes
Bridged-assisted electron transfer. Random matrix theory approach, E. Gudowska-Nowak, G. Papp and J. Brickmann 232 (1998) 247

Non-equilibrium thermodynamic and hydrodynamic theories
A frequency-resolved cavity model (FRCM) for treating equilibrium and non-equilibrium solvation energies, M.V. Basilevsky, I.V. Rostov and M.D. Newton 232 (1998) 189
A frequency-resolved cavity model (FRCM) for treating equilibrium and non-equilibrium solvation energies. 2: Evaluation of solvent reorganization energies, M.D. Newton, M.V. Basilevsky and I.V. Rostov 232 (1998) 201

Equilibrium statistical mechanics and thermodynamics
Water anomalies and the double-well Takahashi model, C.H. Cho, S. Singh and G.W. Robinson 232 (1998) 329

Experiment

-Molecular spectroscopy
A theoretical study of the electronic structure and spectroscopic properties of the low-lying electronic states of the molecule AlSi, F.R. Ornellas and S. Iwata 232 (1998) 95

-infrared
The vibrational spectroscopy of $C_{60}H_{36}$: An experimental and theoretical study, R. Bini, J. Ebenhoch, M. Fanti, P.W. Fowler, S. Leach, G. Orlandi, Ch. Rüchardt, J.P.B. Sandall and F. Zerbetto 232 (1998) 75

Ultrafast laser control of vibrational dynamics for a two-dimensional model of $HONO_2$ in the ground electronic state: separation of conformers, control of the bond length, selective preparation of the discrete and the continuum states, M. Oppel and G.K. Paramonov 232 (1998) 111

-Raman

The vibrational spectroscopy of $C_{60}H_{36}$: An experimental and theoretical study, R. Bini, J. Ebenhoch, M. Fanti, P.W. Fowler, S. Leach, G. Orlandi, Ch. Rüchardt, J.P.B. Sandall and F. Zerbetto 232 (1998) 75

-UV

Fluorescence lifetime of rovibrational states of h_4-acetaldehyde and spectra of d_4-acetaldehyde, S.-H. Jen, T.-J. Hsu and I.-C. Chen 232 (1998) 131

Multiphoton ionization

Laser photodissociation of ketene at 230 nm, M. Castillejo, S. Couris, E. Lane, M. Martin and J. Ruiz 232 (1998) 353

X-ray spectroscopy

On the electronic structure of Cu(III) and Ni(III) in $La_2Li_{1/2}Cu_{1/2}O_4$, $Nd_2Li_{1/2}Ni_{1/2}O_4$, and Cs_2KCuF_6, Z. Hu, G. Kaindl, S.A. Warda, D. Reinen, F.M.F. de Groot and B.G. Müller 232 (1998) 63

Electron impact spectroscopy

Quantitative studies of the photoabsorption (4.5–488 eV) and photoionization (9–59.5 eV) of methyl iodide using dipole electron impact techniques, T.N. Olney, G. Cooper and C.E. Brion 232 (1998) 211

Laser induced fluorescence

Fluorescence lifetime of rovibrational states of h_4-acetaldehyde and spectra of d_4-acetaldehyde, S.-H. Jen, T.-J. Hsu and I.-C. Chen 232 (1998) 131

Ultrafast measurements

Pathway approach to ultrafast photochemistry: potential surfaces, conical intersections and isomerizations of small polyenes, W. Fuß, S. Lochbrunner, A.M. Müller, T. Schikarski, W.E. Schmid and S.A. Trushin 232 (1998) 161

Vibrational energy transfer processes in dye molecules after ultrafast excitation of skeletal modes, T. Dahinten, J. Baier and A. Seilmeier 232 (1998) 239

Synchrotron spectroscopies

On the electronic structure of Cu(III) and Ni(III) in $La_2Li_{1/2}Cu_{1/2}O_4$, $Nd_2Li_{1/2}Ni_{1/2}O_4$, and Cs_2KCuF_6, Z. Hu, G. Kaindl, S.A. Warda, D. Reinen, F.M.F. de Groot and B.G. Müller 232 (1998) 63

Mass spectroscopy

Laser photodissociation of ketene at 230 nm, M. Castillejo, S. Couris, E. Lane, M. Martin and J. Ruiz 232 (1998) 353

Objects

Bulk systems

Gases

Hartree–Fock limit properties of the water dimer in absence of BSSE, A. Famulari, M. Raimondi, M. Sironi and E. Gianinetti 232 (1998) 275
Ab initio MO–VB study of water dimer, A. Famulari, M. Raimondi, M. Sironi and E. Gianinetti 232 (1998) 289
A density functional study of weakly bound hydrogen bonded complexes, A.K. Chandra and M.T. Nguyen 232 (1998) 299
Towards quantitative diatomics-in-molecules model for the water molecule, B.L. Grigorenko, A.V. Nemukhin and V.A. Apkarian 232 (1998) 321

Supersonic beams

Fluorescence lifetime of rovibrational states of h_4-acetaldehyde and spectra of d_4-acetaldehyde, S.-H. Jen, T.-J. Hsu and I.-C. Chen 232 (1998) 131
Laser photodissociation of ketene at 230 nm, M. Castillejo, S. Couris, E. Lane, M. Martin and J. Ruiz 232 (1998) 353

Liquids neat

Water anomalies and the double-well Takahashi model, C.H. Cho, S. Singh and G.W. Robinson 232 (1998) 329

Liquid mixtures and solutions

A frequency-resolved cavity model (FRCM) for treating equilibrium and non-equilibrium solvation energies, M.V. Basilevsky, I.V. Rostov and M.D. Newton 232 (1998) 189
A frequency-resolved cavity model (FRCM) for treating equilibrium and non-equilibrium solvation energies. 2: Evaluation of solvent reorganization energies, M.D. Newton, M.V. Basilevsky and I.V. Rostov 232 (1998) 201
Vibrational energy transfer processes in dye molecules after ultrafast excitation of skeletal modes, T. Dahinten, J. Baier and A. Seilmeier 232 (1998) 239
Molecular dynamics studies of NaCl solutions in methanol–water mixtures. An effect of NaCl on hydrogen bonded network, E. Hawlicka and D. Swiatla-Wojcik 232 (1998) 361

Crystals

Effect of pressure and temperature on the H-atom tunneling in solid phase chemical reactions. The acridine/fluorene system, L.I. Trakhtenberg and V.L. Klochikhin 232 (1998) 175

Metals and alloys

A theoretical study of the electronic structure and spectroscopic properties of the low-lying electronic states of the molecule AlSi, F.R. Ornellas and S. Iwata 232 (1998) 95

Surfaces

Dependence of volume-produced H^- ions on the wall recombination probability of H atoms in a low pressure H_2 positive column, J. Loureiro and J. Amorim 232 (1998) 141

Low-dimensional materials
A Valence-Bond/Hartree–Fock method to determine the Hubbard transfer integrals in organic conductors, F. Castet, L. Ducasse and A. Fritsch 232 (1998) 37

Plasmas
Dependence of volume-produced H^- ions on the wall recombination probability of H atoms in a low pressure H_2 positive column, J. Loureiro and J. Amorim 232 (1998) 141

Microscopic and mesoscopic systems

Single atoms, molecules and assemblies (incl. biological)
Theoretical study of the Cl 1s and 2p near edge photoabsorption spectra of HCl by accurate ab-initio configuration interaction and density functional approaches, G. Fronzoni, M. Stener, P. Decleva and G. De Alti 232 (1998) 9

Molecules (neutral and ionic)

-diatomic
Bonding in molecular dications from the classical valence bond viewpoint. A case study of CO^{2+}, R. Polák 232 (1998) 25
A theoretical study of the electronic structure and spectroscopic properties of the low-lying electronic states of the molecule AlSi, F.R. Ornellas and S. Iwata 232 (1998) 95
Effect of the angular dependence of the barrier height on the features of the $F + H_2$ reaction, V.M. Azriel, L.Yu. Rusin, M.B. Sevryuk and J.P. Toennies 232 (1998) 307
Ab initio variational calculation of dynamic polarizabilities and hyperpolarizabilities. I. Polarizability and quadratic hyperpolarizability of water, carbon monoxide and hydrogen fluoride, A. Lembarki, C. Barbier, Ph. Lemaire and E.N. Svendsen 232 (1998) 343

-small polyatomics
Ultrafast laser control of vibrational dynamics for a two-dimensional model of $HONO_2$ in the ground electronic state: separation of conformers, control of the bond length, selective preparation of the discrete and the continuum states, M. Oppel and G.K. Paramonov 232 (1998) 111
Fluorescence lifetime of rovibrational states of h_4-acetaldehyde and spectra of d_4-acetaldehyde, S.-H. Jen, T.-J. Hsu and I.-C. Chen 232 (1998) 131
Pathway approach to ultrafast photochemistry: potential surfaces, conical intersections and isomerizations of small polyenes, W. Fuß, S. Lochbrunner, A.M. Müller, T. Schikarski, W.E. Schmid and S.A. Trushin 232 (1998) 161
Quantitative studies of the photoabsorption (4.5–488 eV) and photoionization (9–59.5 eV) of methyl iodide using dipole electron impact techniques, T.N. Olney, G. Cooper and C.E. Brion 232 (1998) 211
Ab initio study of excited-state intramolecular proton dislocation in salicylic acid, A.L. Sobolewski and W. Domcke 232 (1998) 257
Ab-initio study of a radiative association mechanism application to the $CH_3^+ + H_2$ reaction, D. Talbi and M.C. Bacchus-Montabonel 232 (1998) 267
Ab initio variational calculation of dynamic polarizabilities and hyperpolarizabilities. I. Polarizability and quadratic hyperpolarizability of water, carbon monoxide and hydrogen fluoride, A. Lembarki, C. Barbier, Ph. Lemaire and E.N. Svendsen 232 (1998) 343

-other large

The vibrational spectroscopy of $C_{60}H_{36}$: An experimental and theoretical study, R. Bini, J. Ebenhoch, M. Fanti, P.W. Fowler, S. Leach, G. Orlandi, Ch. Rüchardt, J.P.B. Sandall and F. Zerbetto 232 (1998) 75

Vibrational energy transfer processes in dye molecules after ultrafast excitation of skeletal modes, T. Dahinten, J. Baier and A. Seilmeier 232 (1998) 239

-polymeric and biological

Theoretical study of X-ray circular dichroism of amino acids, O. Plashkevych, V. Carravetta, O. Vahtras and H. Ågren 232 (1998) 49

Molecular aggregates

-dimers

Hartree–Fock limit properties of the water dimer in absence of BSSE, A. Famulari, M. Raimondi, M. Sironi and E. Gianinetti 232 (1998) 275

Ab initio MO–VB study of water dimer, A. Famulari, M. Raimondi, M. Sironi and E. Gianinetti 232 (1998) 289

A density functional study of weakly bound hydrogen bonded complexes, A.K. Chandra and M.T. Nguyen 232 (1998) 299

-van der Waals molecules

Hartree–Fock limit properties of the water dimer in absence of BSSE, A. Famulari, M. Raimondi, M. Sironi and E. Gianinetti 232 (1998) 275

Ab initio MO–VB study of water dimer, A. Famulari, M. Raimondi, M. Sironi and E. Gianinetti 232 (1998) 289

-complexes

Solvation of chromone using combined Discrete/SCRF models, C. Alemán and S.E. Galembeck 232 (1998) 151

Free radicals (incl. hydronium and muonium)

Monte Carlo and molecular orbital study of solvent effect on the electronic structure and hyperfine coupling constants of the $(CH_3)_2NO$ radical: the effect of electron transfer between the solute and solvent molecules, T. Yagi, H. Takase, K. Morihashi and O. Kikuchi 232 (1998) 1

Phenomena

Molecular structure

A density functional study of weakly bound hydrogen bonded complexes, A.K. Chandra and M.T. Nguyen 232 (1998) 299

Towards quantitative diatomics-in-molecules model for the water molecule, B.L. Grigorenko, A.V. Nemukhin and V.A. Apkarian 232 (1998) 321

Vibrations and rotations of molecules

Ultrafast laser control of vibrational dynamics for a two-dimensional model of $HONO_2$ in the ground electronic state: separation of conformers, control of the bond length, selective preparation of the discrete and the continuum states, M. Oppel and G.K. Paramonov 232 (1998) 111

Fluorescence lifetime of rovibrational states of h_4-acetaldehyde and spectra of d_4-acetaldehyde, S.-H. Jen, T.-J. Hsu and I.-C. Chen 232 (1998) 131
Dependence of volume-produced H^- ions on the wall recombination probability of H atoms in a low pressure H_2 positive column, J. Loureiro and J. Amorim 232 (1998) 141
Towards quantitative diatomics-in-molecules model for the water molecule, B.L. Grigorenko, A.V. Nemukhin and V.A. Apkarian 232 (1998) 321

Electronic structure and states
Theoretical study of the Cl 1s and 2p near edge photoabsorption spectra of HCl by accurate ab-initio configuration interaction and density functional approaches, G. Fronzoni, M. Stener, P. Decleva and G. De Alti 232 (1998) 9
Bonding in molecular dications from the classical valence bond viewpoint. A case study of CO^{2+}, R. Polák 232 (1998) 25
A Valence-Bond/Hartree–Fock method to determine the Hubbard transfer integrals in organic conductors, F. Castet, L. Ducasse and A. Fritsch 232 (1998) 37
On the electronic structure of Cu(III) and Ni(III) in $La_2Li_{1/2}Cu_{1/2}O_4$, $Nd_2Li_{1/2}Ni_{1/2}O_4$, and Cs_2KCuF_6, Z. Hu, G. Kaindl, S.A. Warda, D. Reinen, F.M.F. de Groot and B.G. Müller 232 (1998) 63

Structure of solids, liquids and glasses
Water anomalies and the double-well Takahashi model, C.H. Cho, S. Singh and G.W. Robinson 232 (1998) 329
Molecular dynamics studies of NaCl solutions in methanol–water mixtures. An effect of NaCl on hydrogen bonded network, E. Hawlicka and D. Swiatla-Wojcik 232 (1998) 361

Optical activity
Theoretical study of X-ray circular dichroism of amino acids, O. Plashkevych, V. Carravetta, O. Vahtras and H. Ågren 232 (1998) 49

Molecular interactions
A Valence-Bond/Hartree–Fock method to determine the Hubbard transfer integrals in organic conductors, F. Castet, L. Ducasse and A. Fritsch 232 (1998) 37
Dependence of volume-produced H^- ions on the wall recombination probability of H atoms in a low pressure H_2 positive column, J. Loureiro and J. Amorim 232 (1998) 141
Hartree–Fock limit properties of the water dimer in absence of BSSE, A. Famulari, M. Raimondi, M. Sironi and E. Gianinetti 232 (1998) 275
Ab initio MO–VB study of water dimer, A. Famulari, M. Raimondi, M. Sironi and E. Gianinetti 232 (1998) 289
A density functional study of weakly bound hydrogen bonded complexes, A.K. Chandra and M.T. Nguyen 232 (1998) 299

Spectral bandshapes and intensities
The vibrational spectroscopy of $C_{60}H_{36}$: An experimental and theoretical study, R. Bini, J. Ebenhoch, M. Fanti, P.W. Fowler, S. Leach, G. Orlandi, Ch. Rüchardt, J.P.B. Sandall and F. Zerbetto 232 (1998) 75
A theoretical study of the electronic structure and spectroscopic properties of the low-lying electronic states of the molecule AlSi, F.R. Ornellas and S. Iwata 232 (1998) 95

Energy transfer processes
Vibrational energy transfer processes in dye molecules after ultrafast excitation of skeletal modes, T. Dahinten, J. Baier and A. Seilmeier 232 (1998) 239

Photochemistry
Pathway approach to ultrafast photochemistry: potential surfaces, conical intersections and isomerizations of small polyenes, W. Fuß, S. Lochbrunner, A.M. Müller, T. Schikarski, W.E. Schmid and S.A. Trushin 232 (1998) 161
Effect of pressure and temperature on the H-atom tunneling in solid phase chemical reactions. The acridine/fluorene system, L.I. Trakhtenberg and V.L. Klochikhin 232 (1998) 175
Ab initio study of excited-state intramolecular proton dislocation in salicylic acid, A.L. Sobolewski and W. Domcke 232 (1998) 257

Intramolecular dynamics

-vibrational energy redistribution (incl. vibrational dissociation)
Vibrational energy transfer processes in dye molecules after ultrafast excitation of skeletal modes, T. Dahinten, J. Baier and A. Seilmeier 232 (1998) 239

Nonlinear responses (incl. optical)
Ab initio variational calculation of dynamic polarizabilities and hyperpolarizabilities. I. Polarizability and quadratic hyperpolarizability of water, carbon monoxide and hydrogen fluoride, A. Lembarki, C. Barbier, Ph. Lemaire and E.N. Svendsen 232 (1998) 343

Multiphoton phenomena
Ultrafast laser control of vibrational dynamics for a two-dimensional model of $HONO_2$ in the ground electronic state: separation of conformers, control of the bond length, selective preparation of the discrete and the continuum states, M. Oppel and G.K. Paramonov 232 (1998) 111

Reactions (incl. dissociation)

-isolated molecules
Laser photodissociation of ketene at 230 nm, M. Castillejo, S. Couris, E. Lane, M. Martin and J. Ruiz 232 (1998) 353

-collisional
Effect of the angular dependence of the barrier height on the features of the $F + H_2$ reaction, V.M. Azriel, L.Yu. Rusin, M.B. Sevryuk and J.P. Toennies 232 (1998) 307

Tunneling
Effect of pressure and temperature on the H-atom tunneling in solid phase chemical reactions. The acridine/fluorene system, L.I. Trakhtenberg and V.L. Klochikhin 232 (1998) 175

Electron transfer
Monte Carlo and molecular orbital study of solvent effect on the electronic structure and hyperfine coupling constants of the $(CH_3)_2NO$ radical: the effect of electron transfer between the solute and solvent molecules, T. Yagi, H. Takase, K. Morihashi and O. Kikuchi 232 (1998) 1

Quantitative studies of the photoabsorption (4.5–488 eV) and photoionization (9–59.5 eV) of methyl iodide using dipole electron impact techniques, T.N. Olney, G. Cooper and C.E. Brion 232 (1998) 211
Bridged-assisted electron transfer. Random matrix theory approach, E. Gudowska-Nowak, G. Papp and J. Brickmann 232 (1998) 247

Proton and hydrogen atom transfer
Effect of pressure and temperature on the H-atom tunneling in solid phase chemical reactions. The acridine/fluorene system, L.I. Trakhtenberg and V.L. Klochikhin 232 (1998) 175
Ab initio study of excited-state intramolecular proton dislocation in salicylic acid, A.L. Sobolewski and W. Domcke 232 (1998) 257

Ionization (incl. Rydberg states)
Theoretical study of X-ray circular dichroism of amino acids, O. Plashkevych, V. Carravetta, O. Vahtras and H. Ågren 232 (1998) 49

Isotopic effects
Quantitative studies of the photoabsorption (4.5–488 eV) and photoionization (9–59.5 eV) of methyl iodide using dipole electron impact techniques, T.N. Olney, G. Cooper and C.E. Brion 232 (1998) 211
